

eStylez SKU Builder

MAS 90 & MAS 200

eStylez SKUBuilder for Sage Software's® e-Business Manager adds enhanced functionality and simplified product presentation while maintaining the integration with the MAS 90® and MAS 200® accounting systems.

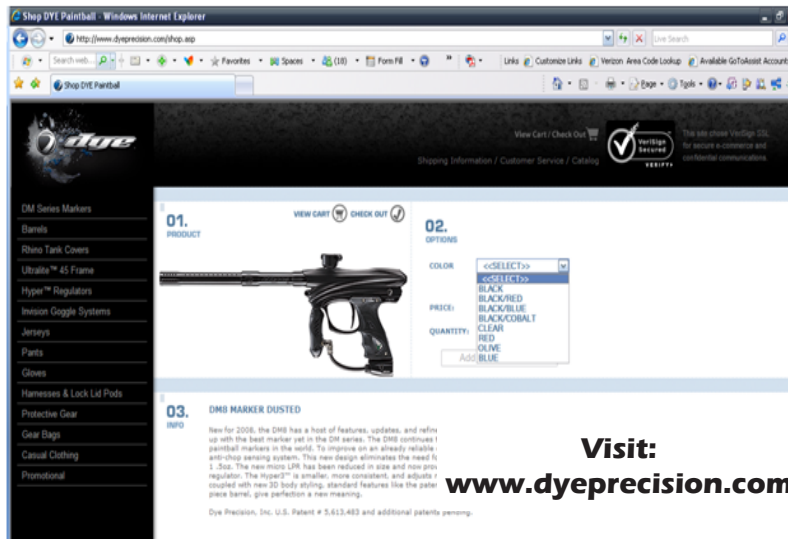

Often your inventory has many variations of a particular item that are distinguished by a characteristic such as color. You want to sell those items via e-Business Manager but you do not want your customers to have to navigate through every part number to find the red widget.

With eStylez SKUBuilder, you can present your customer with a single item and allow him to select the option of his choice. eStylez handles the rest and builds the correct part number "on the fly" so that it goes to the shopping cart and the right item is

relieved from inventory during order processing. No editing sales orders, no extra comment lines for each item.

is presented with so he can see what his favorite widget looks like in red, blue or red and blue stripes.

eStylez SKUBuilder requires no additional databases or MAS 90 or MAS 200 program modifications. The data is maintained as part of Inventory Maintenance in your Inventory Module. You retain control of your data and can add new items to SKUBuilder at any time without having to contact your

While it would be simpler if every option for every item was available at the same price, that is not always the case. eStylez SKUBuilder can account for pricing based on an option change and display that pricing to the end-user based on his choices.

In addition, eStylez SKUBuilder gives you the option to display different images based on one of the options the customer

webmaster.
